

**Challenge:** Choose the best loops and toggle the switches.

For this challenge, there are several ways to solve the puzzle—you could use [while loops](#), [for loops](#), or a combination of the two types.

Figure out a [pattern](#) to toggle open each switch, and see if you can break it down to use a combination of two loops. It's up to you which loops you use!

---

```
func move() {  
    for i in 1 ... 3 {  
        moveForward()  
    }  
    turnRight()  
}  
  
while !isBlocked || isOnClosedSwitch {  
    if isOnClosedSwitch {  
        toggleSwitch()  
    }  
    else {  
        move()  
    }  
}
```
